Mobile POS

Mobile realization is now POSSible!

Full solution implementation
Hardware and software

Full wireless capabilities

Real-time record-keeping and updates

Mobile POS propels your business forward with a robust feature set that combines the power and functionality of your traditional lane with the sleek versatility of mobility. Cafés, stadiums, trade shows, and outdoor sales where POS lanes aren't feasible will benefit from the convenience mobility has to offer. Customer service-minded businesses will love how tiny technology creates a more personable and friendly interaction. Busy stores will enjoy the effectiveness of a floating POS lane that significantly reduces lines. Save on equipment costs and make efficient use of your sales floor space. If customer satisfaction, versatility, and value beyond what a traditional lane provides are what you are looking for, **Mobile POS** is the answer you need.

- **Integrated RMS** Items, Reports, & Customers
- **Instantaneous** credit card authorizations
- **Capture & print** digital signatures
- **Speed** customer checkout
- **Ring up** sales

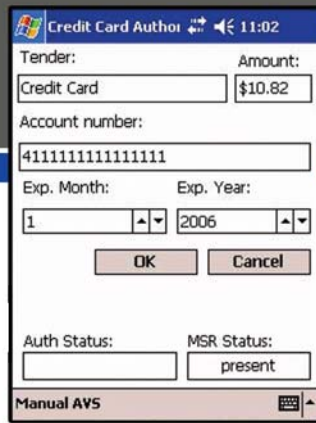

800-322-9471 Canada: 800-353-0268

SPECIALTY RETAIL SPECIALISTS SINCE 1990

Authorize

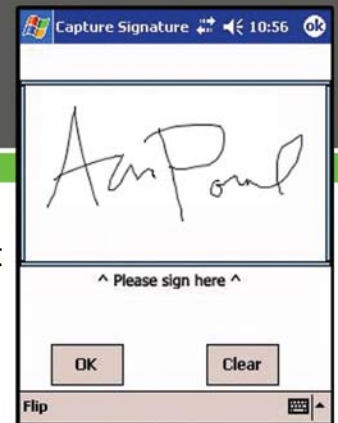

- Instant authorization
- Direct to Vital
- No extra software needed
- No extra hardware needed
- Manual or swipe entry

Swipe a credit card and connect directly to Vital through the internet for instant authorizations. No additional software or hardware is required beyond **Mobile POS** and your PDA.

Capture

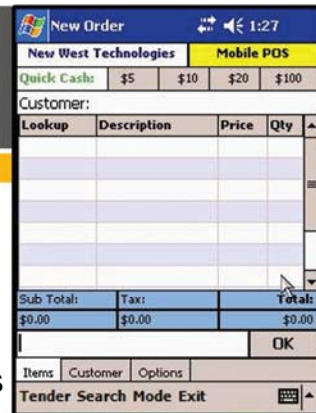

- Digital signature capture
- Print signature to receipt
- Sign directly on screen
- Flip screen alignment

Capture the signatures of your clients in a digital format. Print the digital signature of your customers directly onto their receipt for easy signature verification.

Invoice

- Barcode or manual entry
- Real-time record updates
- RMS Customer Discounts
- RMS Sale Dates
- RMS Sales Tax Schedules
- Edit and view items

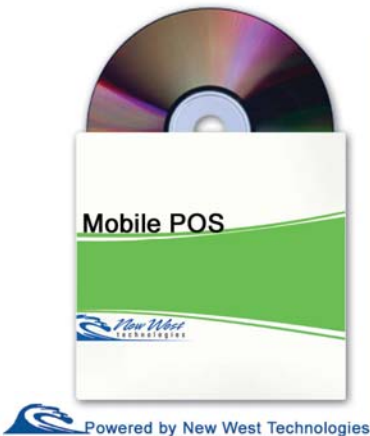

Order entry is a snap with barcode scanning. Update your inventory levels in real time as you process sales. Use your own customer discounting policies and sale dates for quick checkout processing.

Tender

- Cash transactions
- Credit card transactions
- Quick Button bill entry

Tender sales with full wireless mobility. One-touch **Quick Buttons** add convenience for various bill denominations, yet contain capabilities for manual cash tender. Credit card processing is quick and accurate.
