

Synchronize your web store's inventory with your RMS database, painlessly and automatically, with **DRS Linker**.

DRS Linker™ for Microsoft® Retail Management System

DRS Linker is a complete rewrite of our original **DRS Linker SE** for SmartEtail.com clients. DRS Linker now supports a growing list of trading partners, associations, and suppliers. For inclusion in this service, have your trading partner contact us at jumpstart@digitalretailer.com.

DRS Linker currently includes support for SmartEtail.com, Giant Bicycles, Quality Bicycle Products, and YaYa! Bike dealers.

This utility allows you to link selected data from Store Operations or Headquarters to your trading partners via FTP or email. Once configured, Linker runs in the background to automate data transfers.

Virtually any data in RMS can be transferred to the trading partner or recipient of your choice. You determine what data is transferred, how often, to whom, and the method of delivery. Scheduling is handled using Windows Task Scheduler.

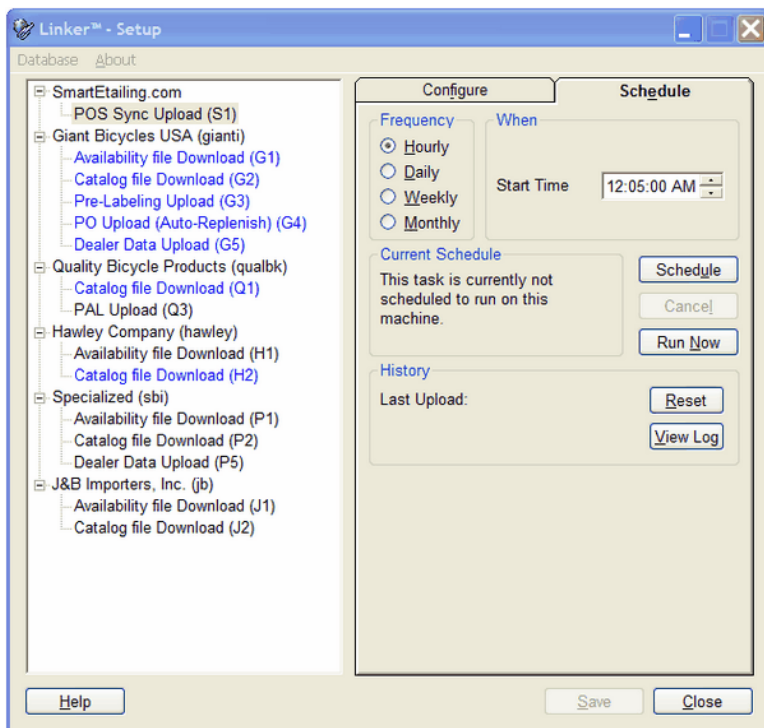

DRS Linker is designed to work with Store Operations or HeadQuarters. DRS Linker is only installed on one PC with access to the Store Operations or HeadQuarters database.

Use **DRS Linker** to:

- Synchronize your RMS database with a website, web hosting service, or local application
- Update monthly data for merchandise planning services and OTB spreadsheets
- Automate pre-labeling programs from suppliers
- Download availability information from supplier warehouses
- Send sales or inventory data to remote business partners
- Contact us and explain your datalinking requirements. Customizations are our specialty

[60-day Free Trial](#)

All upgrades to Service Manager are included with your annual maintenance plan
