# DRS Matrix Master™

for Microsoft® Retail Management System

DRS Matrix Master is a mini-bundle which includes DRS AutoGen and DRS Power Ops. Includes all matrix create/edit/display features to create and maintain matrix items, as well as Purchase Order integration. The final release will include reports and analysis tools.

The quick-add-edit concept behind DRS Matrix Master will save users thousands of keystrokes, while the added flexibility and accuracy will result in better control over inventory.

Matrix Master is designed to work with Store Operations or Store Operations in a HeadQuarters environment.

DRS Matrix Master will:

Set up defaults:
- Auto-generate item lookup codes; user-defined formats include barcode type
- Automate supplier tab updates from POs and copying of supplier reorder number to alias
- Create style sheets to manage matrices in 1-3 dimensions
- Assign margin/markup price calculators for regular, ABC, and lower/upper bound prices with rounding
- Format list view grid lines and/or alternate row colors for easy viewing
- Automate sales tax assignment by location for new item adds (HeadQuarters multi-store)

Create/edit items:
- Add/copy matrix items via quick entry forms
- Enter dimensions with reusable style sheets
- Assign style sheets by dept/category/supplier
- Add additional dimensions in 3 easy ways
- Change matrix item descriptions in batch mode
- Import matrix style sheets from existing items
- Delete items or matrix with associated component items

Display/View:
- Display matrix grids, change views on-the-fly
- Show pictures in large or small format w/Notes
- View on hand, committed, pending, and on order quantities with mouse-over
- View start/stop sale dates or discount schedule
- View all item details from one screen
- Drill-down to Alias, Offline, Member Of, and Supplier/SRN
- Use hot keys to filter items by matrix class or components
- View matrix class items by total units or in matrix grids with drill-down
- View on order details for items from POS

Manager functions:
- Print purchase orders in matrix grid format
- Copy existing POs to create new ones
- Carry forward partial POs
- Create new items and immediately add to PO
- Generate POs based on restocking levels or tag selected items and order
- Two-click label printing to barcode printers
