

DRS PO Loader gives you greater integration with ordering systems used by vendors you depend upon.

DRS PO Loader™ for Microsoft® Retail Management System

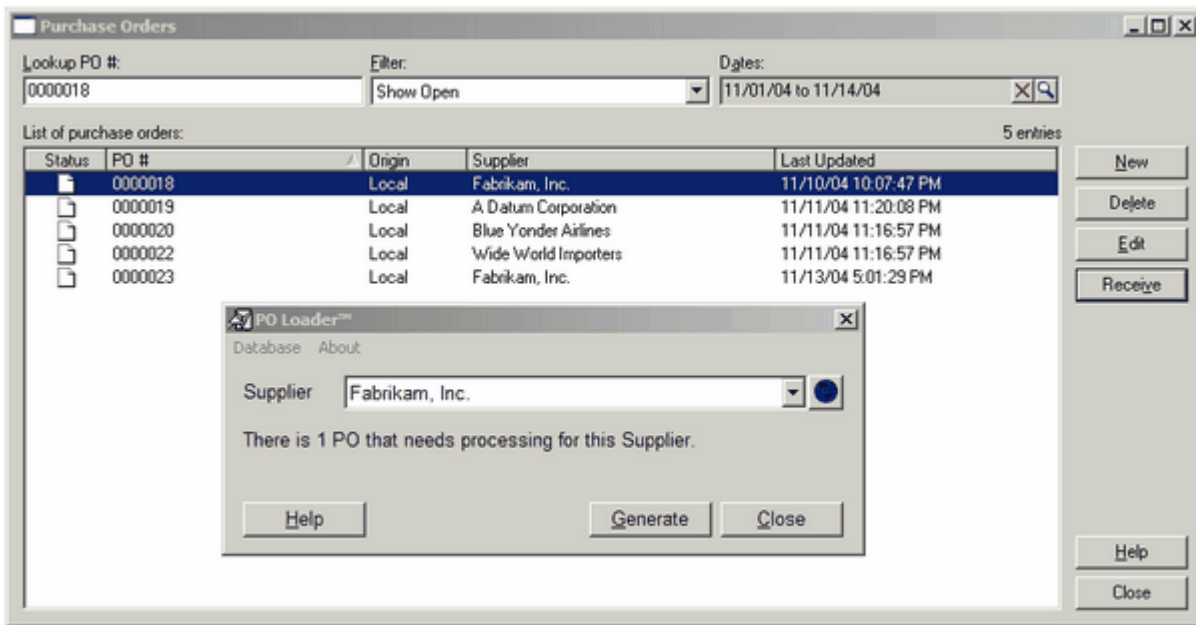

DRS PO Loader allows you to transfer a purchase order created in RMS to a supplier's online order entry system. PO Loader packages the purchase order into a data format compatible with your supplier's order entry system.

Special reports included with PO Loader allow you to view outstanding purchase orders and participate in pre-labeling services from participating suppliers. Pre-labeling puts your store label and pricing on the items you order, so merchandise is shelf-ready upon delivery.

PO Loader is designed to work with Store Operations or Store Operations in a HeadQuarters environment.

Use DRS PO Loader to:

- Package purchase orders for acceptance by a supplier's order entry system
- Quickly log in to a supplier's order entry system
- Process a purchase order online and confirm availability
- Synchronize your online order with your RMS purchase order
- Verify all items on PO's have valid SRNs, the supplier has enough quantity in stock, and cost on PO matches the supplier cost
- Display a list of open POs that are not already Placed (does not show partial POs)
- Upload PO to supplier's order entry system and marks PO as Placed
- Identify PO type to supplier as either store originated or auto-generated (auto-replenish)
- Contact us with your order entry requirements; customizations are our specialty
