

Track Special Orders with ease, and keep your customers happy with attentive service and successful follow-through.

DRS SO Tracker™ v2

for Microsoft® Retail Management System

DRS SO Tracker allows retailers to track special orders in Store Operations from initial order entry through delivery to the customer. SO (Special Order) Tracker runs within Store Operations POS while a Special Order Report in Manager can be used to monitor and manage orders. Users can also run SO Tracker in Manager or in standalone mode to view special orders in progress.

SO Tracker is designed to work with Store Operations or Store Operations in a HeadQuarters environment. SO Tracker

A Special Order Report included with SO Tracker lists all orders in progress, indicating items to be ordered (work orders, layaways and backorders). This report helps manage to-do lists for purchasing, service, sales and delivery personnel.
