

One powerful bundle manages all your retail tasks, from assemblies to special orders to Horizon Hobby catalog import.

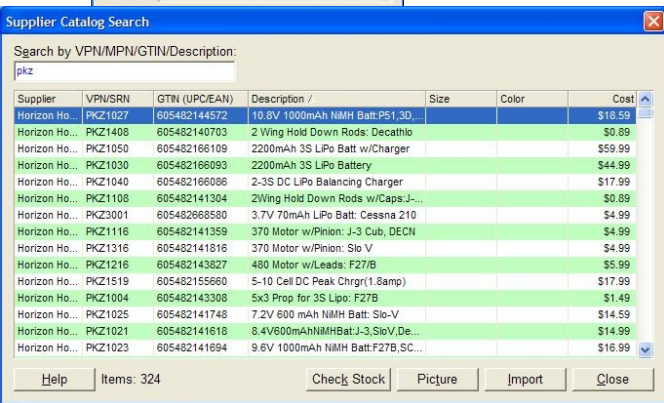

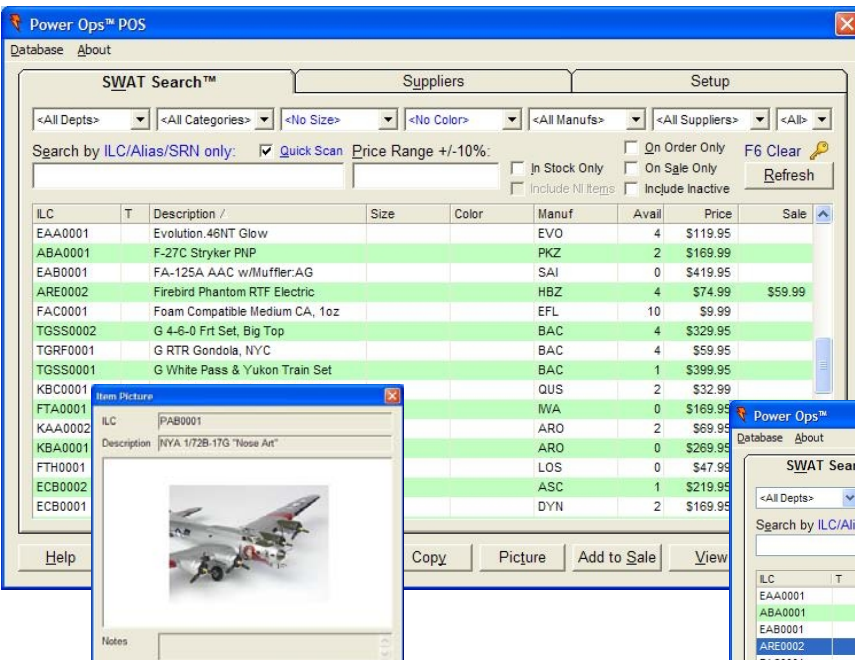

DRS Hobby Bundle™

for Microsoft® Dynamics Retail Management System

With **DRS Hobby Bundle**, one great bundle installs all the tools hobby retailers need to get lightning-fast search enhancements, product catalog import, fast item creation, serialized inventory tracking, special order tracking, database-driven product signs, and much more.

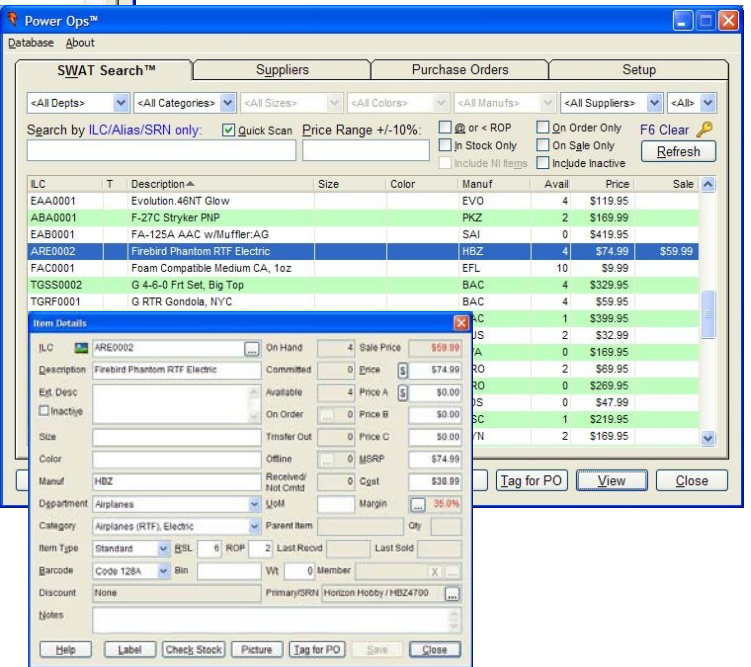

DRS Hobby Bundle includes these great DRS Add-ins for RMS: TenderView, DRS Status Window, SWAT Search, Power Ops with QuickAdd, AutoGen, PO Loader, Special Order Tracker, SmartPOP, DRS Tools, plus 100+ Custom Reports and Templates. Plus one seat of Service Manager is included free with Bundle purchase.

DRS Hobby Bundle is designed to work with Store Operations or Store Operations in a Headquarters environment (multi-store).

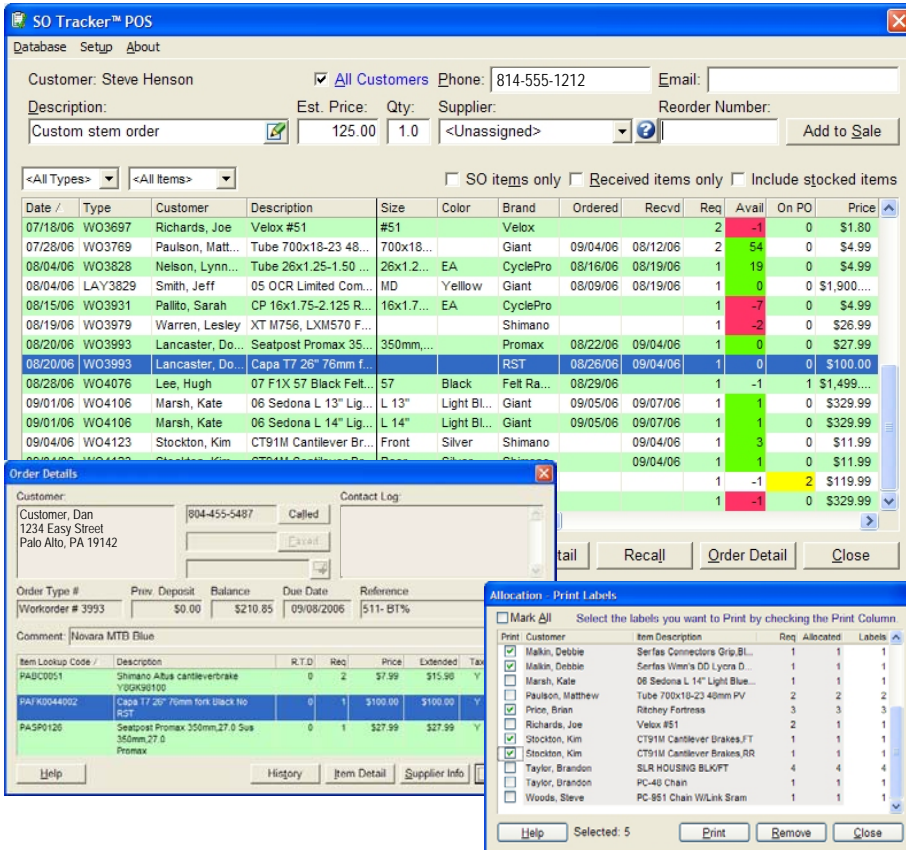

DRS Hobby Bundle packs power:

- **DRS Power Ops** provides enhanced search capabilities, custom item lookup code generation, pricing tables, new item wizards, PO generation, HOST support, and quick access to supplier info.
- **QuickAdd** — import, set price, and sell new items by scanning at the cash counter, or search by part number. Scan & Sell made easy!
- **DRS Tools** marks items inactive based on activity and logical filters
- **Special Order Tracker** manages and monitors customer requests for special purchases
- **PO Loader** send purchased orders to supplier order entry systems; HOST file format is also supported.
- **Service Manager** monitors and manages all your service work from estimates to scheduling to pickup and customer notifications; one seat license is included free with Hobby Bundle
- **SWAT Search** provides enhanced search functions in POS and Manager; tag and sell, add new items to POs and much more
- **TenderView** simplifies balancing cash drawers at end-of-day. View totals and details onscreen; count and balance without running an X report
- **AutoGen** speeds up item code creation with structured or unstructured codes
- **DRS Status Window** adds customer account and item stats to POS along with order alerts
- **Custom Reports/Templates** galore!

- Maintain a customer contact log of phone, email or fax attempts
- Track special orders by store location when used in an HQ environment
- List view filters for Deliverable, On PO, Need to Order, Drop Ship
- Color-coded list views identify action items
- View and recall any customer order to POS
- Add line item comments or extended descriptions; print ext. description on PO
- Generate standard, drop ship, or special order purchase orders
- Auto-allocate received stock to orders
- Label incoming stock with customer account and order information
- Enhanced Special Order report
- View all open orders including stocked items
- Status Window for POS with order alerts

DRS PowerOps™ with QuickAdd™ for Microsoft® Dynamics Retail Management System

DRS PowerOps now includes QuickAdd, so you can increase your database of products as you increase your sales. PowerOps searches your product database first, then supplier catalogs in one click. Catalog data is provided by direct supplier links including Horizon Hobby with warehouse check.

PowerOps provides enhanced search capabilities, matrix management, custom ILC generation, pricing tables, new item wizards, and quick access to your supplier data at POS.

Power Ops is designed to work with Store Operations for single stores or both Store Operations and HeadQuarters Manager in a multi-store environment. Add to Sale functions are available when installed at a POS station. Add to PO functions are available when installed at Store Operations Manager stations.

DRS Power Ops lets you:

- Import, price, and sell new items by scanning at the cash counter, or search by part number
- Assign a margin/markup table to calculate regular price, ABC, lower/upper bound with rounding; or set default import to MAP/MSRP
- Add/copy new items using a quick entry form with complete data entry in one screen
- Create style sheets to easily manage matrix items in 1-3 dimensions
- Change matrix item desc./prices in batch
- Build matrix style sheets from existing items
- View on hand, committed, and pending
- View all items details from one screen with mouse click drill-down to Alias, Offline, and Supplier/SRN entries
- Perform multiple search & tag in one session
- Tag multiple items and assign quantities
