

DRS Status Window populates the POS screen with a margin calculator, customer profile, and order alerts.

DRS Status Window™ for Microsoft® Retail Management System

DRS Status Window lets cashiers see customer data at a glance, at the register. Sometimes customers forget about work orders, special orders, or store credit on file. By flagging this information at the POS, customers can be notified before finalizing new purchases. Salespeople with cost privileges can quickly play "what-if pricing" in POS by changing an item's price in the sales screen. The new margin will display instantly in the DRS Status Window.

Use Status Window to see:

Customer Profile:

- Lifetime sales
- Total savings (from discounted items)
- YTD sales
- Last sale date
- Last serialized item purchased (if you define serialized items in your system)
- Custom text, number, and date fields

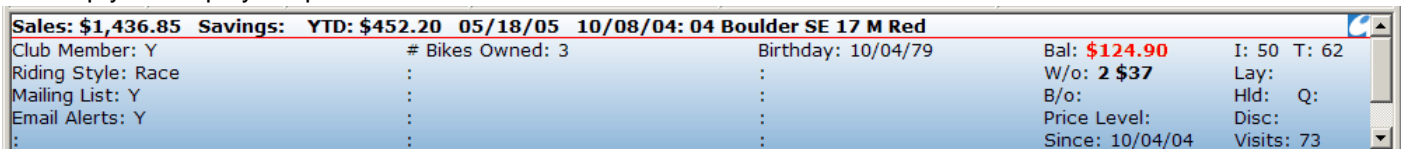

Account information:

- Balance, work orders, backorders, price level, Customer Since date
- Item margin, total margin, layaways, holds, quotes, discount percent, number of visits.

DRS Status Window before sales activity.

During sales activity: Meaningful customer data at the point-of-sale will help your employees provide better customer service.

Field names entered here will be displayed in the Database -> Customers -> Additional tab.

Text Fields:	Numeric Fields:	Date Fields:
<input type="text" value="Child 1"/>	<input type="text" value="Number of kids"/>	<input type="text"/>
<input type="text" value="Child 2"/>	<input type="text"/>	<input type="text"/>
<input type="text" value="Child 3"/>	<input type="text"/>	<input type="text"/>
<input type="text" value="Membership"/>	<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>	<input type="text"/>

Customizable fields allow information important to *your* business to be utilized
